## why tic?

TIC Summer Camp provides a healthy mind and body balance through collaboration, creativity, and growth. Kids, ages 7 to 15, come to TIC to explore technology, but they also get personal attention, confidence building, and the opportunity to test the reaches of their creativity.

Our unique model allows campers to exercise both their mind and body with equal half days of technology program and athletic activities! How we execute the combination of activities provides a balanced, powerful end product, that is not only about gaining knowledge, but the quality of the journey and the memories and skills created along the way.

At TIC, kids learn by having fun!

## our mission

TIC summer camp believes in having an inclusive, encouraging environment that provides a healthy mind-body balance through collaboration, creativity, and growth. Our campers, ages 7 to 15, can expect:

**Mind-Body Balance:** Our program structure evenly splits the day between in-depth Technology instruction and active, confidence-building athletic activities.

**Collaboration:** Campers work with both staff and their peers to problem solve, think critically, and shape our camp culture.

**Creativity:** Our emphasis on choice and pushing boundaries allows campers to deeply explore their interests and capabilities.

**Growth:** Beyond learning Technology and Athletic skills, we're about personal and social growth that promotes empathy, activism, and kindness.
